

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

COMPLETE LISTING OF THE CLAIMS:

Claims 1-6 : (Canceled)

Claim 7 : (New) A computerized device for providing a broadband graphical service creation environment for creating Intelligent Network (IN) services for a broadband integrated services digital network/intelligent network (B-ISDN/IN), the device comprising: building blocks, a picture editor for selecting the building blocks and generating a general logic description of a service, and a code generator, the building blocks being a collection of broadband specific actions, data access and data manipulation routines plus pictorial blocks that define a graphical layout of the service.

Claim 8 : (New) The computerized device of claim 7, wherein the broadband graphical service creation environment comprises broadband intelligent network application protocol (B-INAP) dependent generic service building blocks (GSBB) for handling functions required by the B-INAP.

Claim 9 : (New) The computerized device of claim 7, wherein the broadband service creation environment further comprises generic service building blocks (GSBB) for running a specific message sequence which is interruptible by an asynchronous event; wherein, once the event is handled, an original message sequence is resumable, and the service creation environment is operative for generating service logic programs (SLPs) for supporting a finite state machine.

AMENDMENTS TO THE DRAWINGS:

Please amend Fig. 8 as shown in the replacement sheet following page 7 of this

Response.
